

Program controlled cutting of inlaid parquet

Unique worldwide:
Inlaid parquet is produced efficiently on a program controlled machine, fitting to the individual room geometry or following original designs, for new floors or restorations.

A wide diversity of patterns based on original designs

Accurate cut

Customized patterns, freely programmed

Individual framing

With this newly developed special machine the individual pieces for inlaid parquet or panel parquet are cut using a program control easily and rapidly.

The machine is equally suited for cutting wood for mosaic parquet in herringbone or cube design.
