

The Preset P368LR is a precision tool setting instrument, easy and quick to use, especially designed to meet the requirements of CNC machine operators.

The P368LR measures both the radius/diameter and the length/height of the tools.

Working with different tool holders or various machines can be possible by setting up to four different origins.

The measurements shown on the display can be entered into the machine and the production quickly starts.

## Technical Specifications

- Ø 250 x h 300mm
- Resolution .01mm
- HSK or ISO holder style
- 4 machine origins
- Weight = 12kg
- 2 AA batteries per display

## Advantage

- High quality workmanship/precision
- One touch conversion mm/inch
- Measure all types of tools
- Battery powered, no need for electrical plug
- Large, easy to read display
- Considerable reduction in tool setup times while minimizing material waste

*Standard track feeler*

*Measure many types of tools*

*Spherical track feeler for shaped cutters (optional)*
