

## CNC Nesting Technology.

## German Engineered.

## Made in the USA.

The **HOMAG CENTATEQ N-300** Series CNC routers offer quality machining capabilities for manufacturers of all sizes. From skilled craftsman to networked industrial production, each **N-300** Series solution can be configured to meet your specific trade and production related needs.

### Advantages

- **4x8', 5x10' and 5x12'** table configurations
- **COMPACT** footprints available for small space installations
- **7 and 12** spindle drill blocks available
- **Rigid, reliable and repeatable** construction
- **Accurate high-speed** drilling and part sizing
- Drill blocks, vacuum pump(s), installation, and training are included with stock machine configurations
- **Automation** packages available
- Industry leading **service and support**
- Manufactured in **Grand Rapids, MI**

*Outfeed automation: Increase throughput and cleanliness*

*Full throughfeed automation: Allow the machine to pace the flow of production*

*Automatic label application: Error and labor-free identification of parts*
