

IRONWOOD SL200 SLIDING TABLE SAW

IRONWOOD's SL Series of sliding table saws bring ultimate versatility and flexibility to an operator friendly cutting solution. Fused to be a blend of innovation, dependability and quality, the SL series delivers the quality and precision required for the final chip-free cut, improving the results of subsequent machining.

ADVANCED FEATURES

- 3200mm (10') Sliding Table
- Controls in machine base with digital readout for tilt
- Manual rise, fall, and tilt via handwheel adjustment
- Manual rip fence with integrated digital readout
- Crosscut Miter Fence with two flips stops. Max distance of 3200mm with angle capacity from 0 - 49°
- Manual Scoring Unit with optional shimless scoring system for chip free cuts
- Aircraft grade aluminum sliding table
- Perfected, vertical guidance for accurate, square cuts over the full cutting length
- ProLock System for quick and easy blade changes
- Overhead Blade Guard for increased operator safety

Technical Specifications	SL200
Tilting of arbor	0 - 45.5°
Cutting length	122" (3110 mm)
Rip Capacity	51" (1300mm)
Cutting depth max - 90°	3.93" (100 mm)
Cutting depth max - 45°	2.75" (70 mm)
Main saw motor	7.5 HP (5.5 kW) IE3
Saw speed	3000 / 4000 / 5000 RPM
Standard main blade	305 mm x 3.2 mm x 30 mm
Main blade arbor	30 mm with 2 pin holes
Max Blade Size	14" (355 mm)
Scoring saw motor	1 HP (0.75 kW) 8000 RPM
Scoring blade diameter	120 mm
Dust extraction	800 CFM - (2) 3.9" Ø (100 mm)
Electrical requirement	230V or 460V 3-Phase 60 Hz.
Amperage	230V: 14.75A 460V: 8.5A
Machine weight	2,498 lbs. (1,133 kg)
