

learnSOLIDWOOD

Stiles University Solid Wood Training Program

BASIC

PHASE 1

GRIND200: Grinding Concepts and Operation

Beginning with an introduction to grinding concepts, terminology, and safety, this two-day, in-person course continues by exploring profile templates, accurate measurements, positioning, and universally accepted methods for manual sharpening and shaping of knife blanks.

Two (2) scholarships included with qualifying equipment purchases.

BASIC

PHASE 2

MOULD210: Moulding Concepts and Operation

This two-day, in-person course begins with an introduction to moulding terminology and safety before exploring proper equipment set-up, adjustment, and maintenance by detailing various wood materials, automation components, spindle configurations, tooling, profiles, and processing units.

Two (2) scholarships included with qualifying equipment purchases.
