

# learnSTORE

## Stiles University Storage System Training Program

### BASIC 30 – 60 DAYS PRIOR TO INSTALLATION

PHASE 1

#### **STORE 100:** Introduction to woodStore Programming

Self-paced, online course to introduce the interface, language, and benefits of the intuitive woodStore software that links the purchase system to order processing, manages inventory and offcuts, and optimizes material movements.

*Two (2) 30-day trials included with qualifying equipment purchases.*

### INTERMEDIATE 0 – 30 DAYS PRIOR TO INSTALLATION

PHASE 2

#### **STORE 150:** Intermediate Storage System Programming

Self-paced, online course that explores ideal woodStore programming techniques, storage and transportation optimization, efficient integration methodology, and user interface optimization. This course is meant to replicate portions of STORE200 for those that are unable to attend or need a more immediate solution. Due to its hands-on nature, STORE200 is the preferred method of learning woodstore.

#### **STORE 200:** Storage System Programming and Operation

Three-day, hands-on, in-person course that explores ideal woodStore programming techniques, safe set-up and shut-down procedures, material loading guidelines, storage and transportation optimization, efficient integration methodology, and proper maintenance procedures.

*Two (2) scholarships included with qualifying equipment purchases.*

*Additional onsite production support conducted by a Stiles technician at the time of installation includes explanation of safety requirements, cell integration, operation techniques, and digital manual resources.*
